MACHINE CONNECTION DIAGRAM

A SOLID CUT ABOVE

Electrical Wiring Diagram (ceiling path example)

CNC Connection: #6 copper wire – gauge required throughout connection including ground

- ➔ Run enough length from electrical breaker to wire transformer with ample wire to connect (6 feet)
- ➔ From transformer, run wire to ceiling (conduit to code) then back down to CAD/CAM unit floor level
- ➔ Provide enough wire at CAD/CAM box location (extra 6 feet) for wiring connection
- ➔ Cat5 cable for internet connection to machine
